

4 X 1 Box Rib is designed with 1" high ribs on 4" centers, engineered for maximum structural stiffness. Stucco embossed is standard, for appearance. Aluminum thicknesses available are .032", .040", and .050". Box Rib is stocked in Alcad*. Non-clad is available, but may extend lead time.

* Alcad is aluminum which is produced by metallurgically bonding 7072 aluminum alloy to both sides of an 3004 alloy core. The resulting aluminum composition provides superior corrosion resistance.

Available in ALCLAD and NON-CLAD in 0.032, 0.040, and 0.050.

Finish: Stucco Embossed

Alloy: 3004-7072 Alclad

Widths: 45" (44" Coverage)

Lengths Stocked: 8', 10', 12', in 0.032 and 0.040

Available upon request:

Widths: 38½" and 27½"

Custom order lengths (including 0.050)

Non-clad and Stainless Steel
