

Whispertone® Tackboard is a fiberglass board made from highly resistant flame-attenuated glass fibers with mat facers on one or both surfaces. The top mat surface is smooth and uniform in color and provides a tackable surface for acoustical office furniture and wall panel applications. This product offers uniform thickness, rigidity, color and smoothness.

Whispertone Micromat insulation is specifically engineered for use in acoustical panel and office furniture applications that require an efficient sound-absorbing medium with uniform color and thickness. Additional qualities include ease of fabrication, high tensile strength
